

SK-239C Burglar-alarm Control Unit Mainframe

Functions and Features

- 8 wire +8 wireless zones with microcomputer control, keypad programming and LED
- Matching with various twin beam detectors, fireproof and burglarproof detectors and emergency switches
- Receipt of alarm through fixed telephone, mobile phone, and 110 or 119 Command Center
- Sending alarm information via telephone line; onsite alarm for telephone line breakdown, unauthorized connection, short circuit
- Remote control unit, auto-learning of code checking, automatically identifying 8 wireless zones
- 8 remote control units respectively control the arming and disarming of 8 zones
- Compatibility with C&K, Contract ID (ADEMCO), SHIKE and communication protocols
- 120-second sound section records automatically report the alarm and position, and the sound on site can be monitored
- Onsite arming/disarming or zone arming/disarming through keypad and remote control unit; built-in clock chip makes it possible to automatically in fixed time
- Built-in relay with linked output is able to link video monitoring or other equipment
- data of arming, disarming, alarming, powering on/off stored for inquiry
- Function available in terms of remote and linked control over other electrical appliances with regional telephone
- Different alarming telephone number for different alarm condition
- Auto-reporting of AC power failure, low voltage of battery and detector failure

Specifications

| | | | |
|------------------------------|---|--|---------------|
| Alarm communications | transmitting alarming signal by PSTN dialling | output of power supply (capable of turn-off) | DC 12V 500mA |
| Alarm communication protocol | SHIKE, C&K, Contact ID (ademco) | Power supply for alarming | DC 12V 500mA |
| Number of zones | 8 wire +8 wireless zones | Max output power capacity | DC 12V 1200mA |

| | | | |
|---|---|------------------------|---|
| Programming mode | keyboard Programming and remote Programming | Applicable temperature | -10~55°C |
| alarm response time | 200~800ms | Applicable humidity | <90% |
| Memory capatility of alarming telephone numbers | more than 5 groups of alarming telephone numbers | Power supply | AC220V±10% · 50HZ |
| Arming/disarming mode | By remote control unit · keypad,regional telephone remote Control and timer | Spare power supply | DC 12V 7Ah maintenance-free accumulator |
| voice recording | 20s (120s section optional) | installation style | wall-hanging or embedded |
| Data memory in inquiry | 1 record for power-on time,10 for arming/disarming times, and 4 for alarm information | Material of casing | High-quality steel plate |
| Wireless receipt | 315M(433M optional)and learning of code checking | Dimensions(L·W·H) | 264×80×261mm |
| Alarm linked output | NO/NC · load: 1A 120VAC/24VDC | Weight(plus baltery) | Approx.3.6kg (Approx.6kg) |
